Why I apply for this event?

I apply for this event is because it is a good event for my practice. I will be interesting for me to experience and develop my practise to the public and see how they will react to my dance piece. It gives me the opportunity to publicise my work in a local place in hoping for more opportunity in the future.

Statement for apply this event.

My practice obtain a musician and a dancer to explore the movements of dance through materials and music interpretation. My concept is to create performances to encourage and involve the audiences to experience dance as an activity or a show. My intention is to show that dance can be as naive as a child's play and enjoyment of dance.

The performance is a 5-10 minutes improvisational and experimental dance responding to a guitar score. The dance will be performed on a large piece of paper with paint experimenting an interpenetration score of a guitar. This piece is to attract the attention of the audiences to appreciate the fun side of dance rather than just the serious side of the dance performance.

What happen after university?

I applied to the event and also have done an YCN competition to show the wide range of skills that I obtained and willing to explore. I have contacted the Norfolk Dance Art Collective, Dance East in Ipswich and many more. Having this connection it will give me opportunity to collaborate or to create work for them in the near future.

I am also looking at entering to some drawings competition such as the Jerwood Drawing competition because I think that the work have the sense of expression as the marks that has been created by the movements give it character.

Besides opportunities and competitions, I also have created an online show to sell my artwork as a freelancing artist. The book that I have created for experiments act as an artist book for me. It show the best of the drawings that I have done. I have planned to sell the photos that I have created from my YCN project and create more images with me performing because I think it is more interesting and shows my concept better as I am performing that will initiate the audiences to involve in dance.
